

The Time is Right for the New Ultra Low Sulfur Diesel (ULSD) Fuel.

**Free Information Brochure...
Take one to learn more
about ULSD fuel.**

**ULSD will be the dominant diesel
fuel produced after June 1, 2006.**

- New EPA and California standards require a major reduction in the sulfur content of diesel fuels
- ULSD fuel contains less sulfur to improve air quality significantly
- Model year 2007 and later highway diesel engines and vehicles will be equipped with advanced emission control devices and must use ULSD fuel
